

STENKALL
BRUN

The Natural
Spirits
Cooler

Comprised of a trio of **natural elements** – soapstone, glass and cork, the **Stenkall Brun cooler** combines the functions of tasting and cooling spirits by revealing, at the desired temperature, subtle aromas and perfumes that you would never have imagined possible.

The glass, with its expert shape and proportions, confines the aromas, offering to sensitive noses a unique olfactory taste experience. With its rounded shape, this hand-blown glass made in the **Skruf Glass Factory** in Sweden, sits perfectly in your hand.

In the hollow of the **Täljsten stone**, in the space of a few minutes, your drink reaches the perfect temperature for enjoyment.

Place the glass on the table and by simply rolling it, **even out the temperature** and admire the colours reflected by your drink. Now bring the glass to your nose, **smell...** then to your mouth. **Enjoy!**
